SECURITY AND PROMPT SHIELD CAPABILITIES

01

PROMPT SHIELD PROTECTION

Blocks harmful or risky prompts before they're processed, keeping interactions safe and policy compliant.

02

INCIDENT CONTAINMENT

Detects and blocks prompt attacks, including:

- User Prompt Manipulation: Alters AI behaviour to perform unintended actions.
- Document Manipulation: Detects harmful instructions embedded within uploaded documents.

03

DATA SOVEREIGNTY AND GLOBAL EXPANSION

Currently hosted in the UK, with data centres expanding to Europe and the US by 2025, ensuring compliance with local data protection regulations.

ETHERASSIST

DATA PROTECTION FEATURES

01

Full Data Control

Full control over all user data with options to redact, export, or delete as needed.

02

Redaction Capabilities:

Automatically hide sensitive data, like emails or bank details, across all conversations to keep everything private and secure.

03

Data Export and Deletion

Export chat history and delete past conversations to maintain data hygiene and ensure compliance.

04

Admin Control and User Management

Assign administrator roles to control user access, deactivate accounts, and manage data settings efficiently.

Export conversations

Purge conversations

Redact future conversations

Redact previous conversations

ETHERASSIST

FEATURE: REFLECTIVE

NEW FEATURE in v1.3

Transforming how IT professionals solve complex problems
with intelligent, context-aware insights.

Key Benefits:

Intelligent Insights: Gain answers that consider every aspect of your IT challenges.

Scenario Exploration: Explore alternative solutions for confident decision-making.

Broad Knowledge Access: Draws from a vast library to inform every response.

EXTERNAL VALIDATION OF ETHERASSIST

TEST QUESTION ON INTUNE

ETHERASSIST

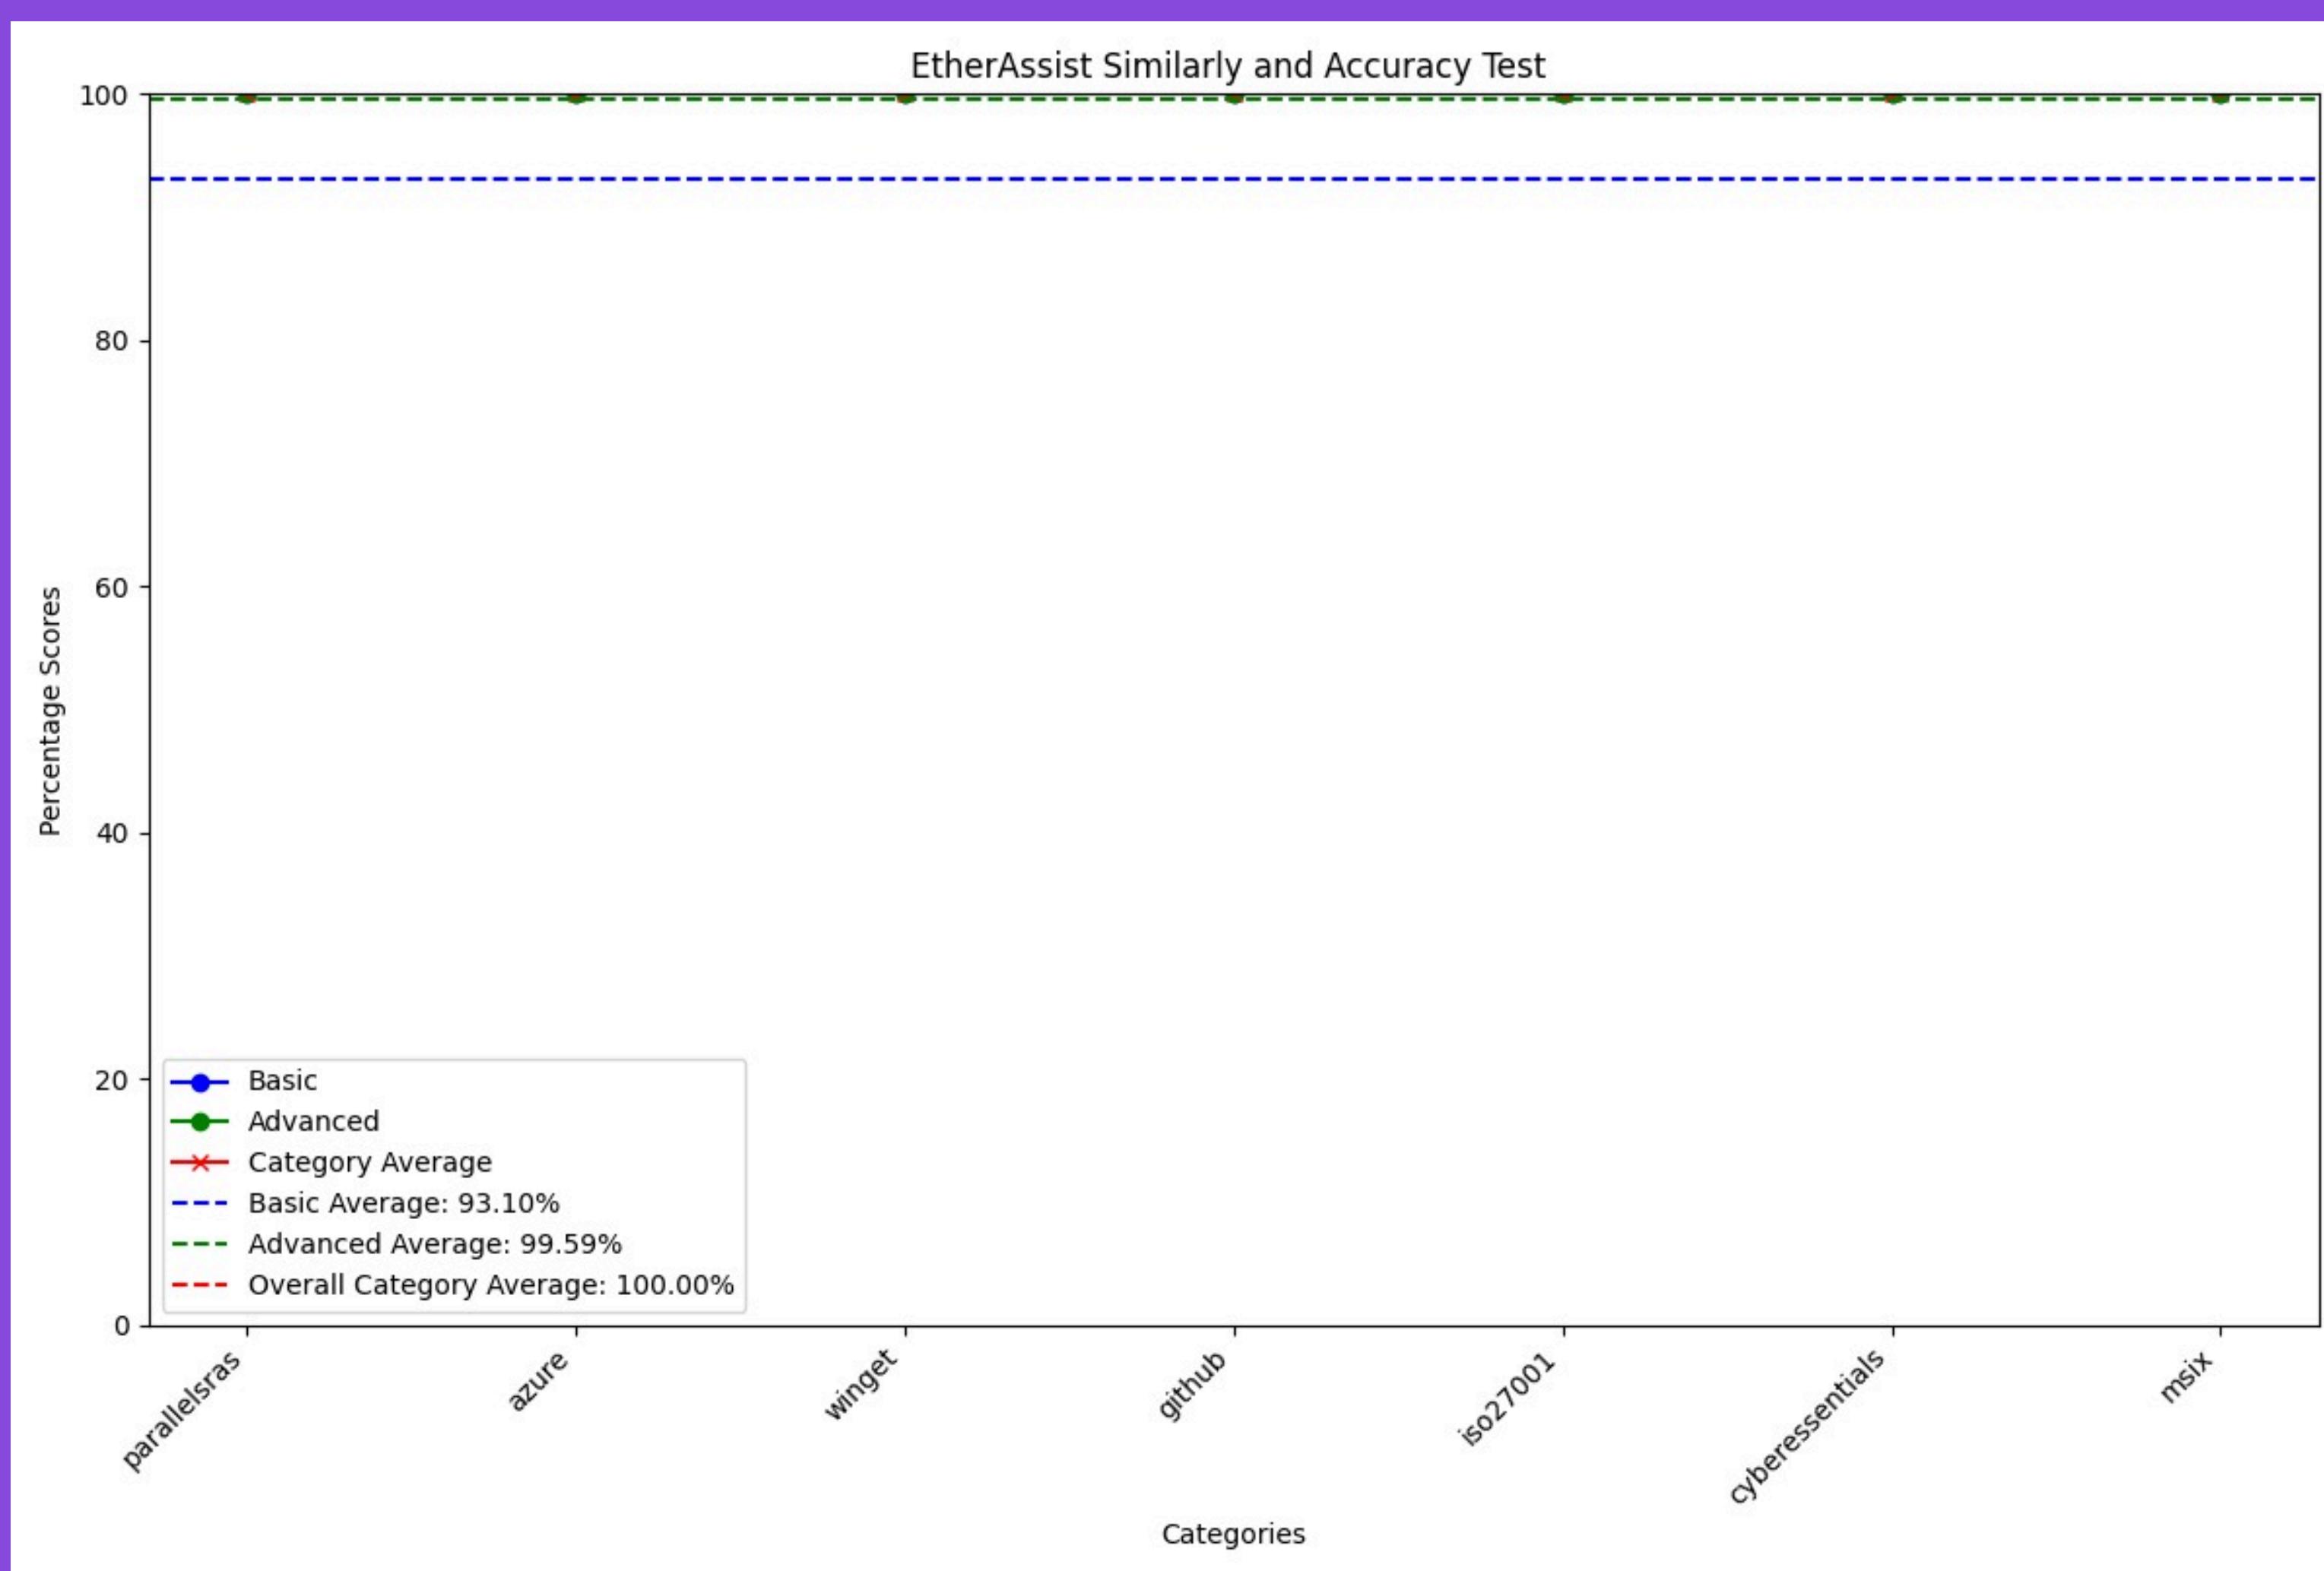

EtherAssist is best suited for IT teams in structured, enterprise settings where strategic planning, long-term management, and user compliance are priorities. Its depth supports complex or mixed environments that require precise configurations and a structured, scalable deployment. For IT professionals who need specific pathways based on unique configurations, EtherAssist excels in providing tailored, in-depth guidance.

COPilot
2

Copilot is highly accessible, offering troubleshooting support and practical script deployment, making it ideal for IT professionals who want quick, direct solutions. It is particularly effective in mid-sized or less-complex environments where rapid deployment and versatile guidance are valued. Copilot's approach is efficient for straightforward setups that require flexibility and quick resolution of tasks.

CHATGPT
3

ChatGPT offers broad, user-friendly guidance, balancing depth with simplicity. It is suitable for preliminary exploration or for IT professionals needing moderate support for an Intune setup without extensive integration planning. ChatGPT is ideal for users less familiar with technical infrastructure, providing an accessible foundation for initial setup in smaller or less regulated environments.

Please enter the question for EtherAssist: What is the event E2EVC ?
Answer: E2EVC, or End-to-End Virtualisation Conference, is a gathering focused on virtualisation technologies and solutions. It brings together IT professionals, developers, and industry experts to discuss advancements, share knowledge, and network. The conference typically covers a range of topics, including virtual desktop infrastructure (VDI), cloud computing, application virtualisation, and related technologies. Attendees can participate in workshops, presentations, and discussions aimed at enhancing their understanding and implementation of virtualisation in various environments.

```

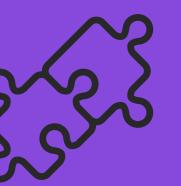

API

The screenshot shows the Ether-Assist API documentation for the `/question` endpoint. It includes fields for `Parameters`, `Request body (application/json)`, and `Responses`. The responses section shows a `200 Success` status with an example response in JSON:

```
{
  "question": "How do I fix 0x00000643 when installing Windows Updates"
}
```

Below the responses, there is an `Example Value: Schema` field containing:

```
{
  "success": true
}
```

INTEGRATION

The screenshot shows the iTerm2 AI Plugin documentation. It features a large green dollar sign icon and the text: "iTerm2 is a terminal emulator for macOS that does amazing things." Below this, there is a "How to Install" section with instructions: "Download the package and unzip it. Place in /Applications. You don't need to run it, iTerm2 will locate it".

ETHERASSIST

INDEPENDENT EVALUATION

Topic: Intune

"EtherAssist shines as a resource for IT professionals who need granular, infrastructure-aware guidance and in-depth procedural clarity. Its focus on enterprise-specific pathways (e.g., co-management and tenant attach) makes it ideal for teams managing complex, large-scale "

US Consulting Company

CUSTOMER TESTIMONIAL

"Efficient AI has been a game-changer for our business. It has changed how we approach compliance reporting and ISO audits. Since using this tool, we've seen remarkable improvements in speed, accuracy, and overall efficiency. Compliance audits that once took days are now streamlined into hours, freeing up valuable resources and reducing stress for our team. EtherAssist AI is, without a doubt, the most transformative technology shift I've witnessed in my career."

UK ISO Auditor

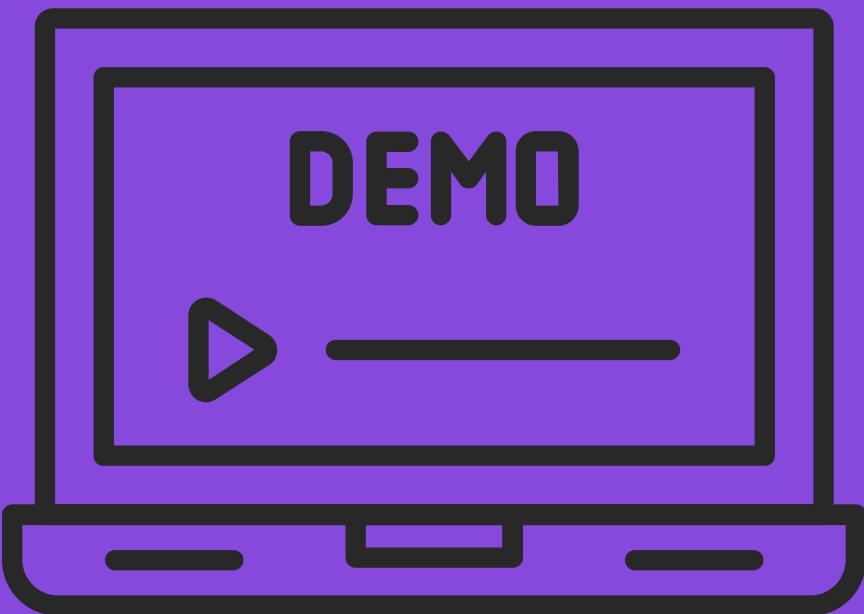

CUSTOMER TESTIMONIAL

"After being invited to try EtherAssist, we found it an easy decision to continue using it due to its cost and value. It has been a game-changer for our small team, supporting us with technical questions, compliance, policy creation, and general IT operations, allowing us to work more efficiently and better support the business."
